

Dear Sir/Madam,

At Roll The Dice, we are passionate about the use of games for good and are developing a curriculum offering.

The purpose of our organisation is to provide inclusive opportunities for improving social health, mental health and education through tabletop gaming. In addition to this, we are delivering objectives from the 2014 National Curriculum.

Roll The Dice aims to provide the opportunity for young people to explore the world of tabletop gaming, regardless of their experience. Our space is designed to be welcoming and friendly, as well as conducive to developing creative and logistic skills, allowing imagination to flow and friendships to be formed.

We understand the importance of home education and the freedom it brings to be creative within the confines of the UK Government's National Curriculum. We have therefore created a bespoke curriculum package which allows us to use tabletop gaming to meet educational benchmarks. This is achieved through the use of Games Workshop's Warhammer 40,000 game system: the most popular tabletop game in the world.

Please see the next page for a breakdown of each subject and area of study that can be met through our approach.

Each child is unique and requires tailored support in education. To this end, we will work with you to put together a package which allows your child to reach their full potential within their academic learning.

Sessions can be held as part of a group, or on an individual basis depending on your particular arrangements and needs.

The sessions are led by a qualified teacher (QTS, B.Ed Hons, M.Ed, NQML) who has over 14 years of experience across the Primary Curriculum.

If you are interested in discussing this further, or would like more information, please contact us through our email:

rollthedicecornwall@gmail.com

Our website has more information about us as a C.I.C. as well as the other services that we offer:
